

## OBJECTIVE

Highly motivated and enthusiastic recent graduate with a strong academic background and a passion for learning. I am a quick adapter to new technologies and environments, with strong problem-solving skills. Also, as a dedicated chess player, I excel in strategic thinking and decision-making.

## TECHNICAL SKILLS

- **Languages:** JavaScript, Java, PHP, HTML, CSS
- **Framework:** React, Express
- **Libraries:** Redux, Tailwind, Cloudinary, Socket.IO, Axios, Material UI
- **Tools:** Git, Github, Docker, VS Code
- **Cloud Platform:** AWS, Digital Ocean, Cloud functions
- **Database:** MongoDB, MySQL(partially)

## EDUCATION

<b>Bachelor of Engineering</b> VGEC - Ahmedabad	<b>CGPA: 7.69</b> 2022-2026
----------------------------------------------------	--------------------------------

<b>Higher Secondary Education</b> Oxford School of Science - Amreli	<b>CGPA: 9.22</b> 2020-2022
------------------------------------------------------------------------	--------------------------------

## ACHIEVEMENTS

<b>AWS</b> - Cloud Practitioner Certification	<i>Feb - 2025</i>
<b>HackerRank</b> - Problem Solving (Basic)	<i>Oct - 2024</i>
<b>LeetCode</b> - Solved More than 100+ problems	

## PROJECTS

<b>NOC Issuance System</b> - JavaScript, React, MongoDB	<b>Hackathon - SIH</b>
<ul style="list-style-type: none"><li>• Developed an end-to-end No Objection Certificate (NOC) website for the fire department, automating the application process and eliminating manual workflows.</li><li>• Implemented secure file uploads using Cloudinary, ensuring data integrity and compliance with security standards.</li></ul>	

<b>Real Time ChatApp</b> - JavaScript, React, MongoDB	<b>Personal Project</b>
<ul style="list-style-type: none"><li>• Developed a full-stack real-time chat application with React and Node.js, featuring secure authentication using Bcrypt and Socket.IO for instant messaging.</li><li>• Implemented key features including friend groups, friend search, media sharing (send &amp; download), and real-time notifications for enhanced user engagement.</li><li>• Optimized the application's front-end and back-end for enhanced performance and scalability.</li></ul>	

<b>Appointment Booking System</b> - JavaScript, EJS, MongoDB	<b>Personal Project</b>
<ul style="list-style-type: none"><li>• Developed an appointment booking system with features like appointment scheduling, notifications, secure login, and meeting rescheduling.</li><li>• Integrated a calendar view for managing time slots and availability, ensuring efficient scheduling and conflict resolution.</li><li>• Streamlined the appointment booking process, enabling users to easily manage their meetings and appointments.</li></ul>	

**College Buddy** - JavaScript, React, MongoDB**Hackathon - GEC**

- Developed a Website providing a centralized platform for students to access course materials, simplifying access to essential resources.
- Implemented secure login with student credentials and enabled filtering by semester and branch for personalized content delivery.
- Facilitated file handling and direct downloads, also allowing professors to add materials, creating a collaborative learning environment.

**Zoom Meeting** - PHP, Laravel, MySQL**Hackathon - 2.0**

- Developed a Project Management System (PMS) enabling task assignment, progress tracking, and team collaboration.
- Implemented features for creating projects, assigning tasks to team members, and monitoring task status.
- This is a practice system to ensure that key components and technologies work well together.
